

# mini-critters

## care sheet

### size

6-8 lbs

### lifespan

6-12 years

### active times

Dawn and Dusk

### diet

Timothy Hay, Rabbit Pellets,  
Leafy Greens (2 cups per 6lbs of rabbit)

### exercise

Bunnies need exercise outside of their cage for a few hours every day. Let your rabbit roam around the house or yard (under supervision). Rabbits love toys and will throw them around, so make sure to get a few!

### maintenance

Rabbits can be litter trained! By nature, they will choose a corner of their cage as their "go" spot. Put a bunny litter box (lined with newspaper) there, and they'll be good to go! Change the litter box daily and the entire cage weekly. Softly brush them regularly to get rid of excess hair.
